

## GRAFITSCHMELZTIEGEL GRAPHITE CRUCIBLE CRISOLE DE GRAFITO

Verwendung für Nicht-Edelmetall- und Edelmetallguss

Ton-Grafit Qualität

Produkt aus hochwertigen Rohstoffen

Plastisch gedrehte oder mechanisch gepresste Grafiterschmelztiegel

Anwendung für alle Arten der Aufheizung inkl. Induktion

Anwendungstemperatur max. 1450 °C

Gleichmäßige Wärmeleitung

Use for non-precious metal and precious metal casting

Clay graphite quality

Product made from high-quality raw materials

Plastically shaped or mechanically pressed graphite crucibles

Application for all heating methods incl. Induction

Application temperature max. 1450 °C

Consistent thermal conductivity

Aplicación en coladas de metales preciosos y no preciosos

Calidad arcilla-grafito

Producto hecho a partir de materias primas de alta calidad

Crisol de grafito fabricado por torneado plástico o por prensado mecánico

Aplicación en todo tipo de calentamiento, incluida la inducción

Temperatura máxima de aplicación de 1450 °C

Conductividad térmica uniforme
